

HP Designjet 500 and 800 Series Printers

500 • 800 • 800ps

High-quality, large-format color printing for technical and business customers who need illustrations, schematics, drawings, plans, or presentations.

High-quality lines and images

- **Best combination of line quality and image printing.** Four-color, high-resolution writing system with pigmented black delivers excellent line quality plus high quality imaging.
- **HP color layering technology.** The writing system combines multiple ink drops on a single dot to create smooth color transitions, so you get top quality results for images, renderings, and illustrations.
- **Media choices for every task.** Broad portfolio of basic and premium printing materials support a wide array of technical and graphics applications.

Fast, reliable performance

- **Quick turnaround for tight deadlines.** Line drawings print in as little as 60 seconds so you can view your work and present or make changes in real time.
- **Easy system integration.** Windows, Macintosh, and AutoCAD drivers ensure you have the compatibility you need; standard interfaces and network capability (optional on HP Designjet 500 models) make adding these printers to your system fast and simple.
- **HP quality and reliability.** These printers deliver solid performance, day in and day out; and they're backed by support and service from the worldwide leader in large-format printing.

Choices for all environments

- **Solo or shared.** HP Designjet 500 personal printers offer solid performance for single users or small groups—all files process in your computer prior to transmission. HP Designjet 800 series workgroup printers are designed to be shared with a virtual computer inside for on-board processing, built-in networking, a hard drive, and support for file queuing and nesting.
- **Multiple sizes and configurations.** All 500 and 800 series printers come in both 24" and 42" widths; the 24" models can be used for tabletop output or with optional stand and bin.
- **RIPs for managing color.** Choose the HP Designjet 800ps models with an embedded RIP or add the optional software RIP to an HP Designjet 500. Either way, you'll get color management tools that help you get the color you need: offset press emulation, ICC profiles for Windows and Macintosh, and Apple® ColorSync™ compatibility.

HP Designjet 500 and 800 Series Printers

1. Separate ink cartridges for lower cost per copy and limited user interaction
2. Media stand and bin collect and stack drawings as they print (opt on 24" models)
3. Easy-to-follow control panel for simplified user interaction
4. Smart supplies monitor ink usage and printhead status
5. USB and parallel connections, plus network capability (standard on 800 series) ensure easy system integration
6. Roll feed with automatic cutter loads and feeds easily

Series at a glance

HP Designjet 500

- Choice of 24" and 42" models
- Host-based processing
- Windows and Macintosh drivers
- 16 MB RAM
- PCL3-GUI only
- Optional HP-GL/2 accessory card
- Optional HP JetDirect internal EIO print server

HP Designjet 800

- Choice of 24" and 42" models
- On-board processing
- Windows and Macintosh drivers
- 6 GB hard disk and 96 MB RAM
- HP-GL/2, HP RTL, and CALS G4
- HP Jetdirect internal EIO print server

HP Designjet 800ps

- Choice of 24" and 42" models
- On-board processing
- Windows and Macintosh drivers
- 6 GB hard disk and 160 MB RAM
- HP-GL/2, HP RTL, and CALS G4
- Adobe® PostScript® 3™ RIP
- HP Jetdirect internal EIO print server

Not just a printer. A complete printing system.

Supplies that deliver on quality and value

HP printing supplies maximize the performance of your HP Designjet 500 or 800 series printer by delivering uncompromising print quality, performance, and reliability. The pigmented black ink delivers crisp, dark lines, suitable for reproduction or long-term storage. Individual ink supplies ensure you only replace what you need, when you need it. Smart chips monitor the ink levels and printhead status, so you'll know when your printer needs attention. Media from HP completes the supplies family. HP Premium Printing Material is engineered and tested to ensure the best possible output with HP Designjet printers and ink supplies; HP premium products provide uncompromising image quality, consistency, and performance. HP Universal Printing Material delivers quality results at a low price – they are HP-tested to meet the everyday needs of graphics and technical professionals.

Connectivity that delivers compatibility

Robust Windows and Macintosh drivers—HP develops drivers to help you get the most out of your printing. Whether you need to print house plans from AutoCAD, posters from CorelDraw, or spreadsheets from Excel, HP drivers will provide the quality you need from the applications you use most.

True Adobe PostScript 3—HP offers two solutions for customers who need PostScript output for compatibility, color management, or workflow integration. The EFI Designer Edition software RIP allows HP Designjet 500 customers to process PostScript and EPS files easily on their system. Workgroups that need a network friendly, shared PostScript printer can select one of the HP Designjet 800ps models with a built-in RIP. Both RIPs are true Adobe PostScript 3 solutions and offer a variety of color management options, such as offset emulation, ICC profile support, and Apple ColorSync compatibility.

Services that make a difference

HP offers a variety of services for HP Designjet customers designed to help you manage your printing investment and get more from your HP solution. Online troubleshooting and toll-free phone support mean your questions are answered quickly and efficiently. Warranty extensions and upgrades are available, as well as standard and network installation. And HP Financial Services offers a complete array of attractive leasing and financial lifecycle management services. As the worldwide leader in large format printing, HP delivers more.
