- 1 The HP Print Service Plugin app is available for Android™mobile devices running Android v.4.4 or later. The app is free from Google Play.
 2 Local printing requires mobile device and printer to be on the same network (usually WIFI access points bridge wireless to wired connections) or have a direct wireless connection. Wireless performance is dependent on physical environment and distance from access point. Wireless operations are compatible with 2.4 GHz operations only. Remote printing requires an Internet connection to an HP web-connected printer. Wireless broadband use requires separately purchased service contract for mobile devices. Check with service provider for coverage and availability in your area. See hp.com/go/designigenbility for more details.
 3 One integrated print/scan/copy multifunction device compared to separate print, scan, copy devices.
- 4 Optional security solutions include Secure Disk Erase (available for all models) and Encrypted HD (available only in specific models).
